

What is claimed

- 1 1. A timepiece comprising:  
2 a casing;  
3 a display device secured by the casing; and  
4 an attachment section pivotally attached to the casing; and  
5 wherein the attachment section is configured to be attachable to an object of  
6 interest and pivot in a position to maintain the display device in a substantially upright  
7 position when the attachment section is placed on a substantially horizontal surface.
- 1 2. The timepiece of claim 1 wherein the display device comprises a watch module.
- 1 3. The timepiece of claim 2 wherein the watch module includes one or more modes  
2 selected from a group consisting of a time mode, an altimeter mode, a compass mode, a  
3 barometer mode, an alarm mode and a chronograph mode.
- 1 4. The timepiece of claim 1 wherein the attachment section comprises a carabiner  
2 clip.
- 1 5. The timepiece of claim 2 further comprising a temperature sensor coupled to the  
2 watch module and wherein the display device is operable to display a temperature.
- 1 6. An attachable display apparatus comprising:  
2 a casing configured to hold an electronic device having a display; and  
3 an attachment section coupled to the casing and configured to attach and detach  
4 with an object of interest;  
5 wherein the casing and the attachment section are coupled such that they move  
6 with respect to each other and can be configured to lie essentially in the same plane to  
7 form a first configuration and can be configured to form an angle of ninety degrees or  
8 less between the attachment section and the casing section to form a second  
9 configuration.
- 1 7. The apparatus of claim 6 wherein the electronic device comprises a watch  
2 module.
- 1 8. The apparatus of claim 7 wherein the watch module includes one or more modes  
2 selected from the group consisting of a time mode, an altimeter mode, a compass  
3 mode, a barometer mode, an alarm mode and a chronograph mode.

- 1 9. The apparatus of claim 6 wherein the attachment section comprises a carabiner  
2 clip.
- 1 10. The apparatus of claim 7 further comprises a temperature sensor coupled to the  
2 watch module and wherein the watch module is operative to display an ambient  
3 temperature.
- 1 11. The apparatus of claim 6 wherein the electronic device comprises one selected  
2 from a group consisting of a MP3 player, a multi-function display device, a cell  
3 phone, a personal digital assistant, a calculator, and a digital camera.
- 1 12. The apparatus of claim 6 further comprising a hinge section configured to connect  
2 the attachment section with the casing section in pivoting manner.
- 1 13. The apparatus of claim 6 wherein the electronic device includes a multi-function  
2 module configured to identify and display an altitude, a temperature, a time, a  
3 date, and a compass heading.
- 1 14. The apparatus of claim 6 wherein the second configuration maintains the display  
2 in an upright position while the attachment section placed on a substantially  
3 horizontal surface.
- 1 15. The apparatus of claim 6 wherein the electronic device is radio communication  
2 device.
- 1 16. An apparatus comprising:  
2 an electronic device having a display;  
3 a casing configured to hold the electronic device; and  
4 a clip pivotally attached to the casing, the clip configured to be attachable  
5 to an object of interest, the clip configured to be pivoted to form a stand for the  
6 apparatus.
- 1 17. The apparatus of claim 16 wherein the electronic device comprises a watch.
- 1 18. The apparatus of claim 16 wherein the electronic device comprises an altimeter.
- 1 19. The apparatus of claim 16 wherein the electronic device comprises a personal  
2 audio device.
- 1 20. The apparatus of claim 16 wherein the electronic device comprises a radio  
2 communication device.

- 1 21. The apparatus of claim 16 wherein the electronic device comprises a digital  
2 camera.
- 1 22. The apparatus of claim 16 wherein the electronic device comprises a calculator.
